# Light Table

Veronica Hallock

## Description:

These simple tools help students and are useful for teachers whom often have to create signs and posters for all sorts of school events. The old lightbox we have has an old hard to find bulb and quickly dies. These tablets would replace the antiquated, more expensive, and bulkier system we already have. Episcopal enjoys offering up to date tools and educational experiences for its students. These tablets continue this tradition of high functioning resources for our students and teachers.

These Tablets would assist in allowing me to create a variety of different projects. They would assist students in creating more advanced drawings and help with existing projects that rely on a lot of tracing already, for example my radial symmetry project.
