Total Requests - \$44,360

Design Lab Additions

Veronica Hallock

Description:

This wall mounted mat/glass/plexi cutter offers another tool for a variety of students and faculty in many departments. The arts department can use it to display theater posters or student work in the VPAC or going out to competitions. The Science department says they will house it in the Design lab enabling the engineering students to cut glass, board, and plexi-glass easily and in perfectly straight lines for their projects. This is a tool that would aid in both the arts and the sciences, helping teachers showcase student artwork and helping students create better and more exciting projects.

Cost:

Wall Mounted Cutter--	1,795.00

Acolyte Vestments

Casen Duncan

Description:

As an Episcopal School, our community gathers daily in worship using a variety of items that have been consecrated (or set apart as holy). Lower School and Middle School students come to chapel excited to acolyte, yet the current cassock/surplices have been well worn to the point that finding a cassock with closures that snap has become a challenge. We currently do not own cassocks and surplices large enough for Upper School students to wear. By purchasing new vestments in a variety of sizes we will be able to include more students as well as reinforce the value of our chapel services as a time that has been set aside as holy.

Cost:

\$150/set with a 10% discount for 12 or more

Total Cost \$1,620

Lower School Shade Project

Beth Gardner

Description:

Safe and sustained outdoor gatherings and play are important to nurture and develop the whole child – particularly young children. The opportunities are limitless to support spiritual, intellectual, moral, physical, and artistic growth when early childhood students play and gather outside for extended periods of time. Shade would allow for outdoor play in more areas and more ways away from UV rays.

Early Childhood Playground Shade: Spending time in nature is an essential part of the early childhood school day. Children begin the day outside playing and are often outside for more free play two to three times throughout the day - and over the summer months too. Enjoying a snack or activity at the picnic tables is a special time of the school day too. Yet our main play area - the play structure - is not shaded and the slides and climbers become quite hot in the direct sun. Research supports at least an hour of unstructured, free play for children each day. And the research is clear on the benefits of spending time in nature. Through free and active play, and time in the great outdoors, children develop strong fine and gross motor skills and learn to make decisions, problem-solve, take turns, and share materials. The opportunities for creative play and community-building gatherings are endless too – they re-enact *The Three Billy Goats Gruff* on the bridge, become spies below the play structure, escape from a dinosaur down a slide, and brave tall mountains on the climbing wall. Yet when the temperatures rise, these areas are simply too hot to safely enjoy.

Patio Park Shade: All Lower School teachers are eager for opportunities to take students outside – for special events, for an outdoor picnic, or for a change of scenery to teach a lesson, read, write, solve math problems, participate in messy (and often exciting) activities, or engage in free-choice activities during recess. Shade over our Patio Park and playground picnic tables would open up a whole new shaded and more comfortable world for learning, resting, and playing outside – across all grades and for many special events!

Knight Kast: The Student Voice

Brandi Bergeron and Tiffany Whitehead

Description:

Creating podcasts seamlessly incorporates in the schools mission. Podcasting is another means for students to develop and grow through discussions of current events, sporting or art related events, integrated curriculum projects and much more. Student voice is an integral part of developing the whole child.

A podcasting station within the Aldridge Library will provide Middle School and Upper School students and teachers with an new opportunity to exhibit learning through audio or video means. Podcasting is only limited to the imagination. All content areas can utilize this as an educational tool. Students can use podcasting as a way to focus on both academics and extra curricular activities. Teachers will also have access to record as a means of capturing a lecture or interviewing a professional in the related fields. The area will also include a green wall. Students can use the space to create a cover for their podcast or a video.

Cost:

\$1,6038.75

\$600.00 to order materials to create the space in the library conference room.

\$1000.00 (per John Kojis) to create a window into the conference room for proper student monitoring.

Please see attached Amazon cart list below. The technology components are already available. This is the needed materials to create a proper multi-purpose space.

Purposeful Play on the Playground

Jessica Kurcharchuk

Description:

Lower School Shade Project

Beth Gardner

Description:

The mission of the school says to embody the whole child. Creating new and exciting play spaces not only in the classroom, but outside on the playground ensures that all children have the opportunity to become engaged and grow their body and their mind through purposeful play.

Play is one of the most important aspects in the Early Childhood curriculum. Creating more opportunities for purposeful play on the playground will expand the growth of the whole child. Balls, sand toys and trucks will help the students learn valuable social skills, creativity and hand eye coordination. Learning to share items on the playground is a valuable skill that can lead to great sportsmanship skills later in life.

Cost:

- (3) Green Toys Tractor Vehicle \$11.19/piece
- (2) Green Toys Mini Vehicle for pack \$16.00
- (3) Green Toys Recycling Truck \$15.29/piece
- (4) Weilaga 20 piece die cast cars and trucks \$22.99/piece

Playground Equipment Storage

Tori Taylor

Description:

To provide a safe place to store our playground equipment. We have tried the large plastic deck storage boxes but the lock brakes on them. After school hours and on the weekends, we have a lot of visitors on our campus for different events. With the plastic storage box, you can pull on the lock hard enough that it will eventually brake and then the playground equipment can be accessed by all. I am hoping that the steel box will not be as breakable.

Cost:

\$1,400

28in. H x 71.3 in. W x 31.1 in. D Leisuretime 210 Gal. Metallic Dark Grey Steel Deck Box

Alumni Flags

Lindsay Turner

Description:

Our alumni efforts are wonderfully growing. As we add events/reunions/opportunities for our alumni to come back to campus and gather together we hope their stories can effect and enhance all of the areas we strive for within our mission. Our alumni are such a crucial part of the community we are striving to connect with and further that connection with our current campus and memories. I have an alumni banner that I use for events but would love to include 2 flags that I could use at events on campus as well as off-campus to help with direction and branding. In addition, many reunions have requested to borrow such an item to enhance the locations they are celebrating in or denote a certain location for friends to gather. We would love to further the message that our alumni are unknighted in community beyond their time on campus.

Cost:

Custom Alumni Flag cost - \$297.44 (www.banners.com)

Flag pole/ Ground Spike - \$30.00 (amazon)

Apx taxes/shipping - \$50

Total Cost: \$380

Groundwater Simulation System

Stacy Hill

Description:

The model will not only show the movement of water under ground, but will also help students to investigate the environmental factors that impact groundwater. This will help our students to see how their actions impact our environment and hopefully inspire them to make positive contributions to our environment.

This model would allow for demonstrations and labs for students to visualize what is happening beneath the surface of the Earth.

Cost:

Groundwater Simulation System \$999.99

Estimated shipping \$63.07

Total \$1063.06

Wonderful Workshop Wonderland

Amanda Tupper

Description:

The 3rd Grade would love to create spaces in our room to foster our Reading and Writing Workshops. We would love to make learning fun & exciting with Creative Reading Nooks, Cozy Writing Spaces, and Collaboration Stations! It would be an amazing way to foster a love of reading, writing, & develop the whole child - both intellectually and physically. Kids will love the stimulating environment created by the comfortable reading and writing areas, complete with comfy seating, bookshelves, writing tables, collaboration boards, and plenty of whimsical decorations.

Using the Lucy Calkins Reading and Writing Workshop curriculum, students have a built in time for reading and writing on their own or with a partner with almost every lesson. Having a Creative Reading Nook, Cozy Writing Spaces, and stations for collaboration would give students the ability to have a place just for this. They would be able to have a space dedicated for reading and writing in the most conducive space.

Cost:

\$6,700

1 The Surf Portable Lap Desk, Kids Floor Desk, One-Piece Writing Table, Flexible Seating, 10-Pack Quantity: 2 about \$500 We would like Navy. [Website for Surf Portable Lap Desk](#)

***Total Estimated cost for our Wonderful Workshop Spaces for 3 classrooms: \$6700

This will benefit a total of 60 students for many years to come.

Spruce Up Second Grade Seating

Second Grade Teachers

Description:

Our second graders are an active and engaging age group of learners. We need to be able to move about our classroom in multiple arrangements to promote different styles of learning. We need to replace some old seating with new as well. Our last seating purchases were over 5 years ago.

We gather as a whole group for morning meeting, move around to work in small groups and find quiet spaces for independent reading. Second graders need to move. Staying in one seat is difficult for concentration. Quick and easy manipulation of a room arrangement promotes an efficient learning atmosphere.

Cost:

We are asking for \$1600.00 to cover a variety of seating options and small group work materials.

balance balls, desk chairs on the floor, scoop chairs, lap trays, round cushions and large, mobile wipe boards

This covers tax and shipping.

Student Center Updates

Tom Forti

Description:

Our Student Center is a place of study, collaboration, relaxation and rest for our upperclassmen students. The junior class leaders would like to spearhead a refresh of the Student Center for their peers as they approach their senior year. These student leaders wish to make this space more comfortable and productive for their peers and for all subsequent students coming through the Upper School. The spaces we inhabit on campus set a tone for productivity and positive culture. Updating this space will allow students another space on campus to live out their potential.

This project is not tied to a specific curriculum or department. Rather, it is to help all Upper School students who spend one block of their day in "Free Study" working, collaborating, resting and recharging. The Student Center could be more thoughtfully designed and utilized for the benefit of more students to have a productive space to work and build community.

Cost:

Banquette seating ~\$250/each (6)

Tables ~\$300/each (3)

Clear Whiteboards ~\$200/each (3)

Whiteboard Tables ~\$300/each (3)

Lamps/lighting ~ \$1,000

Charging ports ~ \$1,000

Painting ~\$1,000

Estimated total: \$7,500

It's Electric!

Elizabeth Lewis

Description:

The electrical circuit kits and materials will be used to help students in grades 4 through 8 develop critical thinking and problem-solving skills through hands-on experience with electrical circuits, switches and motors.

Cost:

The total cost with tax and shipping will be \$685.00. See attached document for itemized list and links to photos.
